If the beveled edge is facing the wall, a pocket/lip is created for mastic/sealant to be used if required. Please note that a powder-actuated nail gun set at a high velocity may cause term bars to break, please use proper settings.

To cut StegoCrawl Term Bar, score with a utility knife or wire snips. StegoCrawl Term Bar can be bent back and forth and then broken at desired locations as well.

StegoCrawl Term Bar is flexible enough to bend around corners and contours in the wall for easy installation.
