STEGO INTRODUCES BEAST® DECK FOOT
SCREED ACCESSORY BRINGS NEW EFFICIENCY TO ELEVATED DECK CONCRETE POURS

SAN CLEMENTE, Calif. – Stego Industries, LLC, the construction industry leader in below-slab moisture vapor protection, introduces [BEAST DECK FOOT](#), yet another game-changing concrete placement accessory to enhance its revolutionary [BEAST SCREED](#) system.

Beast Deck Foot is designed to be substituted for [BEAST FOOT](#) in the Beast Screed system, providing all the advantages for elevated deck pours the system has already done for slab-on-grade concrete placement. Concrete placement crews can nail or screw Beast Deck Foot to a wood or metal deck, allowing them to affix Beast Screed posts and adjustable caps for a point-to-point guide screed system.

“The sky is now the limit for concrete contractors,” said Stego Industries Founder and CEO Paul J. Blasdel. “Beast Deck Foot eliminates the final obstacle for concrete placement crews to take the improved efficiency and results of Beast Screed to the highest level of their construction project.”

First introduced in 2016, the Beast Screed system has dramatically improved upon common wet-screed methods, which rely on inefficient and undependable “cow patties” or wet pads for placement crews to check the levelness of their concrete bays or strips. The Beast Screed system provides a visual fixed indicator that determines proper concrete depth while placing concrete, eliminating the need for crews to check and re-check their slabs for levelness.

Contractors across North America who have adopted the new Beast Screed system have seen improved efficiency in their concrete placement crews and far greater floor levelness (fL) test results. Early adopters of the system have reported saving time and resources during their concrete placement, as well as achieving the high fL numbers demanded by some of the most sensitive construction projects in the industry.

“Beast Deck Foot addresses the specific demand by designers of elevated decks: a small yet sturdy mounting foot that leaves virtually no footprint after the removal of concrete forms,” said Beast Deck Foot inventor and product manager Steve Lutes. “With every new accessory in the Beast Screed system, Stego is providing innovative new solutions for decades of inefficient and costly practices to place concrete.”

Beast Deck Foot, along with all of the accessory products in the Beast Screed system, is available through Stego’s international network of construction material suppliers wherever Stego Wrap Vapor Barrier products are sold.

ABOUT STEGO

STEGO INDUSTRIES, LLC is a leader in the below-slab vapor barrier industry. The most-specified vapor barrier in the United States, Stego earned this distinction across North America by earning the respect, trust, and recommendation of the design, engineering and construction communities. Our game-changing barrier solutions are a critical component in the design and construction of efficient, durable and healthy buildings. Stego Industries provides science-based solutions, field-tested results, and strategic speed to market from its 100% solar-powered headquarters in San Clemente, California.
