## Adapting to Industry Standards and Challenges in the Residential Market

Homebuilders face a silent challenge beneath the surface — moisture, soil gases (like radon), and subterranean termites can threaten the overall performance, indoor air quality, and durability of a home. Additionally, **the 2021 IRC® no longer allows generic, low-quality 6-mil or 10-mil polyethylene sheeting as a vapor retarder beneath concrete floor slabs.**

Stego's ***industry-leading barriers and unrivaled support*** equip you with the confidence to create resilient foundations with proven below-slab and crawl space vapor protection for ***healthy, efficient, and durable homes.***

Stay ahead of code minimums and evolving residential green building certification programs with Stego barrier solutions. ***Let's lay the foundation for homes that last — together.™***

**We help you find the right products for your projects.**

## Build for Tomorrow with Homeowner Priorities in Mind – Comfort, Efficiency, and Lasting Value

### Enhanced Home Comfort

Stego's vapor barriers defend against moisture vapor and soil gases from the ground, which is crucial for a more controlled, comfortable, and healthy home environment. As a result, homeowners can enjoy life's moments worry-free.

### Energy Efficiency and Cost Savings

Stego's vapor barriers help maintain a dry and stable foundation; reducing high humidity levels in the home as a result of uncontrolled moisture vapor movement from the ground. This can lead to less strain on HVAC systems and improved energy efficiency, directly benefiting homeowners.

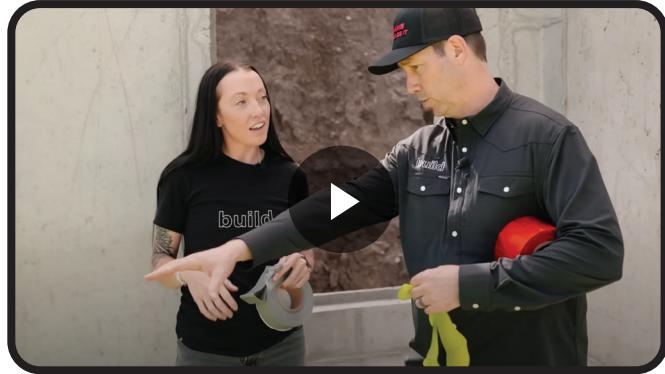

### Long-Term Home Value

By choosing Stego, homebuilders are helping to protect the longevity and integrity of their customer's home. Quality, trusted solutions mean fewer future repairs and a stronger foundation, preserving the value of the future owner's biggest investment.

## As seen on The Build Show

*"In every home we build, we put an active radon system in it. The beauty of putting this vapor barrier down is it really keeps that radon gas underneath the vapor barrier and out of the home. It is just one added step to a really great system in healthy, clean air."*

- **Stephanie Dailey**, StephanieBuildsIt

*"Lots of cool stuff from Stego. They have all the accessories. I have been using their products for over a decade. They make some really bomber stuff."*

- **Matt Risinger**, Risinger Build

*"Stego stands out as an exceptional choice without an exceptional cost."*

- **Steven Baczek**, Steven Baczek Architect

## Stand Out in Your Market

Stego is committed to providing you with the right products to meet the specific demands of your residential footprints and equipping you with the knowledge and resources to help showcase your thoughtful, quality-driven approach. Our team of experts is up-to-date on the latest building codes and offers customized installation support, helping to ensure your projects are protected and on schedule.

How can we assist with your upcoming projects?
