## 5. INSTALLATION

**SEAMS:** Overlap StegoHome Wrap 6 inches and seal with StegoHome Tape. Make sure the area of adhesion is free from dust, dirt, moisture, and frost to allow maximum adhesion of the pressure sensitive tape.

### PIPE PENETRATION SEALING

- 1) Install StegoHome Wrap around pipe by slitting/cutting material
- 2) If void space around pipe is minimal, seal around base of pipe with StegoHome Tape (Stego® Mastic can be used for additional coverage)

### DETAIL PATCH FOR PIPE PENETRATION SEALING

- 1) Cut a piece of StegoHome Wrap that creates a 6 inch overlap around all edges of the void space
- 2) Cut an "X" in the center of the detail patch
- 3) Slide detail patch over pipe, secure tightly
- 4) Tape down all sides of detail patch with StegoHome Tape
- 5) Seal around base of pipe with StegoHome Tape (Stego Mastic can be used for additional coverage)

StegoHome Tape should be installed above 40°F. In temperatures below 40°F take extra care to remove moisture or frost from the area of adhesion. Do not exceed 7 days between StegoHome Tape installation and concrete placement or full protection from UV and weather exposure.

For additional information, please refer to StegoHome's complete installation instructions.
