STEGO™ WRAP
VAPOUR BARRIER
THE INDUSTRY LEADER IN VAPOUR BARRIERS
Our clients have made Stego Wrap the most widely-specified vapour barrier in North America.

**STEGO WRAP VAPOUR BARRIER** is made with our proven trade secret blend of prime virgin resins and additives. Stego Wrap 15-Mil Vapour Barrier is an ASTM E1745 Class A Vapour Barrier (Below 0.01 perms). We focus on producing a product that will maintain its extremely low permeance. The protection of Stego Wrap Vapour Barrier provides the flexibility to change flooring types and overall building use without worrying about below-slab moisture vapour.

Since 1998, Stego’s engineered films have revolutionized the way the construction industry defends against harmful moisture vapour and soil gases with its flagship product: Stego Wrap Vapour Barrier – which dramatically improves performance against moisture intrusion over conventional methods.

- Unsurpassed Performance Track Record
- Longevity and Strength
- Exceptional Tear and Puncture Resistance
- Easy, Reliable Installation
- Competitively Priced
- Life of the Building Warranty
- Installation Support

---

Note – legal notice on last page.
SUPERIOR DEFENSE AGAINST FLOOR FAILURES:
Infiltration of moisture through concrete slabs is a major building defect liability. Stego Wrap Vapour Barrier has an extremely low permeance rating, helping to prevent water vapour, and soil gases (i.e. Radon) from compromising the integrity of the building envelope and leading to serious problems with the concrete slab, floor coverings and indoor air quality. Stego Wrap Vapour Barrier is the best protection against these costly failures.

MOULD PREVENTION:
Mould needs three things to survive: moisture, sustained temperature (approximately between 10° and 50° C), and a food source (dust, drywall, etc.). In any given building environment, contractors can only control one of these variables: moisture. Mould spores are present in 100% of building interiors. If moisture is allowed into your building environment, mould can and will grow. Toxic moulds like Stachybotrys can be fatal for nearly 5% of people (Institute of Medicine 1993), and cause a variety of serious health problems in others. Several recent well-publicised cases involving toxic mould have resulted in multimillion-dollar insurance settlements. Many leading insurance companies have severely limited or removed coverage for mould claims fearing that these claims will bankrupt their companies. Now more than ever, it is critically important that extra attention be paid to preventing the intrusion of moisture vapour from your below-slab environment. Stego Wrap Vapour Barrier offers the level of protection that many architects and engineers are now seeking and is considered to be inexpensive insurance against these costly failures.

LONGEVITY AND STRENGTH:
There is really only one chance to select and install a below-slab vapour barrier, before the slab is placed. So, material strength and longevity are critical to the system’s success. Stego Wrap Vapour Barrier is engineered to get through difficult installation conditions without puncturing or tearing easily, and the prime virgin resins used to create Stego Wrap Vapour Barrier help ensure long-term performance.

STEGO LIFE OF THE BUILDING WARRANTY:
Stego offers the first-of-its-kind warranty for its line of Stego Wrap vapour barriers and retarders. The warranty reinforces the 20-year track record without a single claim of product failure.

Warranty available online at www.stegoindustries.com/legal
It’s the side of the building you never see, but it’s the foundation that keeps your structure safe. Stego Industries creates the game-changing barriers below your building’s floor slab.

</tbody>
</table>

**GTR = Gas Transmission Rate**

Regardless of the location of the water table, humidity below concrete slabs approximates 100%. Typical below slab vapour pressure is more than twice that of building interiors at room temperature, creating vapour drive from the substrate, up through the slab, and into the building.

Stego’s Full Line of Engineered ACCESSORY PRODUCTS

Stego also offers the accessories needed for an ASTM E1643-compliant installation, which have been engineered for our Stego Wrap line: Stego™ Tape, Stego™ Mastic, StegoTack™ Tape, Stego™ Crete Claw™ Tape, and Stego™ Term Bar. Using these products enables an efficient installation, saving time and resources while maintaining the integrity of the vapour barrier system.

Stego Tape
This adhesive is pressure-sensitive, making it ideal for sealing Stego Wrap seams and penetrations.

Stego Mastic
A liquid Vapour retardant membrane, designed to be used with Stego Wrap, for sealing utility and pipe penetrations.

StegoTack Tape
A double-sided adhesive strip used to bond and seal Stego Wrap to concrete, masonry, wood, metal, and other surfaces.

Stego Crete Claw Tape
A multi-layered tape/detail strip that will mechanically seal Stego Wrap Vapour Barrier to concrete.

BEAST™ CONCRETE ACCESSORIES - VAPOUR BARRIER SAFE
Stego Industries recommends the use of BEAST vapour barrier-safe concrete accessories, to help eliminate the use of non-permanent penetrations in Stego Wrap installations.

BEAST™ FOOT FORMING UTILITY
Beast Foot, with its engineered peel-and-stick base, allows the use of blunt-end and threaded nail stakes to be used without puncturing the all-important Stego Wrap Vapour Barrier.

BEAST™ SCREED is a fixed-elevation, point-to-point guide screed system designed to replace common wet-screed methods.

BEAST™ HOOK is a faster, easier way to set 2x4 overhead screeds. Engineered to be re-used over and over again for maximum value.

Stego INSTALLATION
As with any protection system, the installation of Stego Wrap is critical to the system’s effectiveness. Stego Wrap, Stego Accessories and Beast Concrete Accessories make it easy to complete a successful installation. Refer to the complete Stego Wrap Installation Instructions on the website at www.stegoindustries.com
PEACE OF MIND IS OF GREAT VALUE...
A FREE SERVICE OFFERED BY STEGO INDUSTRIES

When you choose Stego™ Barrier Solutions and products, you gain access to a large network of full-time technical sales representatives providing unmatched local support and service.

Stego Installation Support - where our industry leading experts back up the high quality of our products.

Contact

Please contact us to get in touch with the nearest Stego representative. We look forward to working with you on your next project.

3. **PRODUCT DESCRIPTION**

**USES:** Stego Wrap 15-Mil Vapour Barrier is used as a below-slab vapour barrier.

**COMPOSITION:** Stego Wrap 15-Mil Vapour Barrier is a multi-layer plastic extrusion manufactured with only high grade prime, virgin, polyolefin resins.

**ENVIRONMENTAL FACTORS:** Stego Wrap 15-Mil Vapour Barrier can be used in systems for the control of soil gases (radon, methane), soil poisons (oil by-products) and sulfates.

5. INSTALLATION

UNDER SLAB: Unroll Stego Wrap 15-Mil Vapour Barrier over an aggregate, sand or tamped earth base. Overlap all seams a minimum of 150 mm (6") and tape using Stego™ Tape or Stego™ Crete Claw™ Tape. All penetrations must be sealed using a combination of Stego Wrap and Stego accessories.

For additional information, please refer to Stego’s complete installation instructions.

6. AVAILABILITY & COST

Stego Wrap 15-Mil Vapour Barrier is available through our network of building supply distributors. For current cost information, contact your local Stego Wrap distributor or Stego Industries’ Sales Representative.

7. WARRANTY

Stego Industries, LLC believes to the best of its knowledge, that specifications and recommendations herein are accurate and reliable. However, since site conditions are not within its control, Stego Industries does not guarantee results from the use of the information provided herein. Stego Industries, LLC does offer a limited warranty on Stego Wrap. Please see www.stegoindustries.com/legal.

3. PRODUCT DESCRIPTION
USES: Stego Mastic is designed to be used as a vapour retarding membrane for use in conjunction with Stego™ Wrap Vapour Barrier/Retarder. Stego Mastic can be used for sealing utility and pipe penetrations in Stego Wrap.

COMPOSITION: Stego Mastic is a medium viscosity, water-based, polymer-modified anionic bituminous/asphalt emulsion.

SIZE: Stego Mastic comes in 7.57-litre (2 gal) or 18.9-litre (5 gal) pails, and 591-millilitre (20 oz) sausage tubes.

4. TECHNICAL DATA

| TABLE 1: PHYSICAL PROPERTIES OF STEGO MASTIC |
|-----------------|-----------------------------|------------------|
| PROPERTY        | TEST                        | RESULTS          |
| Tensile         | ASTM D412                   | 221 kPa (32 psi) |
| Elongation      | ASTM D412                   | 3860%            |
| Resistance to Decay | ASTM E154               | 10% perm loss    |
| Accelerated Aging | ASTM G23                  | No Effect        |
| Permeance       | ASTM E96 (perms)            | 9.7 ng/(m²*s*Pa) [0.17 gr/(ft²*hr*in-Hg)] |
| Hydrostatic Water Pressure | ASTM D751         | 193 kPa (28 psi) |
| Adhesion to Concrete & Masonry | ASTM C836  | 1.2 kN/m (7 lbf/in) |
| Hardness        | ASTM C836                   | 75               |
| Crack Bridging  | ASTM C836                   | No Cracking      |
| Low Temp Flexibility | ASTM C836           | No Cracking      |
5. INSTALLATION

PREPARATION:
• A test application simulating the project environment should always be done prior to final usage of Stego Mastic.
• All Surfaces should be dry and free of loose materials, oils and other contaminants. The surfaces should be cleaned in the same fashion as the test surface in order to ensure proper results.
• Store above 4°C, and apply above 4°C and below 38°C.

PENETRATIONS:
To repair penetrations in Stego Wrap, cut Stego Wrap just big enough to fit over and around the penetration so as to minimise void space. Liberally apply Stego Mastic around the penetration to keep the integrity of the membrane intact. Stego Mastic can be applied from sausage tubes with a standard sausage gun and/or from pails by brush, roller, or trowel.

NOTES: 1) If needed to minimise void space around penetrations, utilise a detail patch of Stego Wrap or Stego Pre-Cut Pipe Boot to fit over the penetration and seal the patch/boot with Stego Tape prior to applying Stego Mastic. 2) Solvent-based products should not be applied over this product. 3) Clean all tools with kerosene and/or oil-based cleaners.

For additional information, please refer to Stego’s complete installation instructions.

6. AVAILABILITY & COST

Stego Mastic is available through our network of building supply distributors. For current cost information, contact your local Stego distributor or Stego Industries’ Sales Representative.

7. WARRANTY

Stego Industries, LLC believes to the best of its knowledge, that specifications and recommendations herein are accurate and reliable. However, since site conditions are not within its control, Stego Industries does not guarantee results from the use of the information provided and disclaims all liability from any loss or damage. NO WARRANTY, EXPRESS, IMPLIED OR STATUTORY, IS GIVEN AS TO THE MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR OTHERWISE WITH RESPECT TO THE PRODUCTS REFERRED TO. Please see www.stegoindustries.com/legal.

8. MAINTENANCE

None required.

9. TECHNICAL SERVICES

Technical advice, custom CAD drawings, and additional information can be obtained by contacting Stego Industries or by visiting the website.

international@stegoindustries.com
www.stegoindustries.com

3. PRODUCT DESCRIPTION
USES: Stego Tape is a low-permeance tape designed for protective sealing, hanging, seaming, splicing, and patching applications where a highly conformable material is required. It has been engineered to bond specifically to Stego™ Wrap, making it ideal for sealing Stego Wrap seams and penetrations.

COMPOSITION: Stego Tape is composed of polyethylene film and an acrylic, pressure-sensitive adhesive.

SIZE: Stego Tape is 10 cm x 55 m (3.75” x 180’). Stego Tape ships 12 rolls in a case.

4. TECHNICAL DATA

APPLICABLE STANDARDS:
Pressure Sensitive Tape Council (PSTC)
• PSTC 101 – International Standard for Peel Adhesion of Pressure-Sensitive Tape

American Society for Testing & Materials (ASTM)
• ASTM E1643 - Standard Practice for Selection, Design, Installation, and Inspection of Water Vapour Retarders Used in Contact with Earth or Granular Fill Under Concrete Slabs

5. INSTALLATION

SEAMS: Overlap Stego Wrap 150 mm (6”) and seal with Stego Tape. Make sure the area of adhesion is free from dust, dirt, moisture and frost to allow maximum adhesion of the pressure sensitive tape.

PIPE PENETRATION SEALING
1) Install Stego Wrap around pipe by slitting/cutting material
2) If void space around pipe is minimal, seal around base of pipe with Stego Tape (Stego™ Mastic can be used for additional coverage)

DETAIL PATCH FOR PIPE PENETRATION SEALING
1) Cut a piece of Stego Wrap that creates a 150 mm (6”) overlap around all edges of the void space
2) Cut an “X” in the centre of the detail patch
3) Slide detail patch over pipe, secure tightly
4) Tape down all sides of detail patch with Stego Tape
5) Seal around base of pipe with Stego Tape (Stego Mastic can be used for additional coverage)

Stego Tape should be installed above 4°C. In temperatures below 4°C take extra care to remove moisture or frost from the area of adhesion.

For additional information, please refer to Stego’s complete installation instructions.

6. AVAILABILITY & COST

Stego Tape is available through our network of building supply distributors. For current cost information, contact your local Stego Wrap distributor or Stego Industries’ Sales Representative.

3. PRODUCT DESCRIPTION
USES: Stego Crete Claw Tape is a multi-layered tape that is used to seal Stego™ Wrap Vapour Barrier to the perimeter of the slab while the concrete is placed. Stego Crete Claw Tape allows wet concrete to cast into the textured top surface to form a mechanical bond/seal.

COMPOSITION: Stego Crete Claw Tape is composed of polyethylene film, aperture film, and an acrylic, pressure-sensitive adhesive.

SIZE: Stego Crete Claw Tape is 75 mm (3") x 55 m (180'). Stego Crete Claw Tape (75 mm Wide) ships 16 rolls in a case.

5. INSTALLATION
SECURING STEGO WRAP TO SLAB: Clean surface of Stego Wrap to ensure that it is free of moisture, frost, dirt, and debris prior to the installation of Stego Crete Claw Tape. When ready to apply Stego Crete Claw Tape, peel back the release liner and apply to Stego Wrap. Stego Crete Claw Tape should be completely on Stego Wrap.

To detail, cut Stego Crete Claw Tape with a box knife or scissors. Stego Crete Claw Tape should be installed above 4°C for maximum adhesion. For additional information please refer to Stego’s complete installation instructions.

TIP: Wrap the release liner back over the entire roll while unrolling Stego Crete Claw Tape. This technique will allow the release liner to pull off easily and keep it out of the way.
6. **AVAILABILITY & COST**

Stego Crete Claw Tape is available through our network of building supply distributors. For current cost information, contact your local Stego Wrap distributor or Stego Industries’ Sales Representative.

5. **INSTALLATION**

UNDER SLAB: Nail through Stego Term Bar and Stego Wrap to secure material as needed. If the beveled edge is facing the wall, a pocket/lip is created for mastic/sealant to be used if required. Pre-drilled nail holes are provided every 150 mm for ease of installation.

To cut Stego Term Bar, score with a utility knife or wire snips. Stego Term Bar can be bent back and forth and then broken at desired locations as well.

Stego Term Bar is flexible enough to bend around corners and contours in the wall for easy installation.

For additional information, please refer to Stego’s complete installation instructions.
6. **AVAILABILITY & COST**

Stego Term Bar is available through our network of building supply distributors. For current cost information, contact your local Stego Wrap distributor or Stego Industries’ Sales Representative.

7. **WARRANTY**

Stego Industries, LLC believes to the best of its knowledge, that specifications and recommendations herein are accurate and reliable. 3. PRODUCT DESCRIPTION

USES: Stego Pre-Cut Pipe Boots are used to seal around permanent penetrations in Stego™ Wrap.

COMPOSITION: Stego Pre-Cut Pipe Boots are made from Stego Wrap Vapour Barrier (15-mil), and therefore are manufactured from only high grade prime, virgin, polyolefin resins.

SIZE: Stego Pre-Cut Pipe Boots are 450 mm x 450 mm (18" x 18") and 0.38 mm (15 mil) thick. Stego Pre-Cut Pipe Boots ship 10 packs of 25 in a case (250 boots per case).

Email: international@stegoindustries.com
Contact Number: +1 (877) 464-7834
Website: www.stegoindustries.com

10. FILING SYSTEMS

- www.stegoindustries.com
IMPORTANT: Please read these installation instructions completely, prior to beginning any Stego Wrap installation. The following installation instructions are based on ASTM E1643 - Standard Practice for Selection, Design, Installation, and Inspection of Water Vapour Retarders Used in Contact with Earth or Granular Fill Under Concrete Slabs. If project specifications call for compliance with ASTM E1643, then be sure to review the specific installation sections outlined in the standard along with the techniques referenced in these instructions.

UNDER-SLAB INSTRUCTIONS:

Stego Wrap can be installed over an aggregate, sand, or tamped earth base. It is not necessary to have a cushion layer or sand base, as Stego Wrap is tough enough to withstand rugged construction environments.

Unroll Stego Wrap over the area where the slab is to be placed. Stego Wrap should completely cover the concrete placement area. All joints/seams both lateral and butt should be overlapped a minimum of 6” and taped using Stego™ Tape.

NOTE: The area of adhesion should be free from dust, dirt, moisture, and frost to allow maximum adhesion of the pressure-sensitive tape.

ASTM E1643 requires sealing the perimeter of the slab. Extend vapour retarder over footings and seal to foundation wall, grade beam, or slab at an elevation consistent with the top of the slab or terminate at impediments such as waterstops or dowels. Consult the structural engineer of record before proceeding.

SEAL TO SLAB AT PERIMETER:*

NOTE: Clean the surface of Stego Wrap to ensure that the area of adhesion is free from dust, dirt, moisture, and frost to allow maximum adhesion of the pressure-sensitive adhesive.

a. Install Stego™ Crete Claw™ Tape on the entire perimeter edge of Stego Wrap.

b. Prior to the placement of concrete, ensure that the top of Stego Crete Claw Tape is free of dirt, debris, or mud to maximise the bond to the concrete.

STEGO LABOUR SAVER!

This method not only complies with ASTM E1643, but it also:

• reduces labour compared to other perimeter sealing techniques.
• can be used even without an existing wall or footing, unlike alternatives.

OR SEAL TO PERIMETER WALL WITH STEGOTACK™ TAPE:*

a. Make sure area of adhesion is free of dust, dirt, debris, moisture, and frost to allow maximum adhesion.

b. Remove release liner on one side and stick to desired surface.

c. When ready to apply Stego Wrap, remove the exposed release liner and press Stego Wrap firmly against StegoTack Tape to secure.

* If ASTM E1643 is specified, consult with project architect and structural engineer to determine which perimeter seal technique should be employed for the project.
4. In the event that Stego Wrap is damaged during or after installation, repairs must be made. For holes, cut a piece of Stego Wrap to a size and shape that covers any damage by a minimum overlap of 150 mm (6") in all directions. Clean all adhesion areas of dust, dirt, moisture, and frost. Tape down all edges using Stego Tape (see figure 3, Sealing Damaged Areas).

5. IMPORTANT: ALL PENETRATIONS MUST BE SEALED. All pipe, ducting, rebar, wire penetrations and block outs should be sealed using Stego Wrap, Stego Tape and/or Stego Mastic (see figure 4a, Pipe Penetration Sealing).

STEGO WRAP PIPE PENETRATION REPAIR DETAIL:
1: Install Stego Wrap around pipe penetrations by slitting/cutting material as needed. Try to minimise the void space created.
2: If Stego Wrap is close to pipe and void space is minimised then seal around pipe penetration with Stego Tape and/or Stego Mastic.
(See Figure 4a)
3: If detail patch is needed to minimise void space around penetration, then cut a detail patch to a size and shape that creates a 150 mm (6") overlap on all edges around the void space at the base of the pipe. Stego Pre-Cut Pipe Boots are also available to speed up the installation.
4: Cut an "X" the size of the pipe diameter in the centre of the pipe boot and slide tightly over pipe.
5: Tape down all sides of the pipe boot with Stego Tape.
6: Seal around the base of the pipe using Stego Tape and/or Stego Mastic.
(See Figure 4b)

MULTIPLE PIPE PENETRATION SEALING:
Multiple pipe penetrations in close proximity and very small pipes may be sealed using Stego Wrap and Stego Mastic for ease of installation (see figure 5, Multiple Pipe Penetration Sealing).

NOTE: Stego Industries, LLC’s (“Stego”) installation instructions are based on ASTM E1643 - Standard Practice for Selection, Design, Installation, and Inspection of Water Vapour Retarders Used in Contact with Earth or Granular Fill Under Concrete Slabs. These instructions are meant to be used as a guide, and do not take into account specific job site situations. Consult local building codes and regulations along with the building owner or owner’s representative before proceeding. If you have any questions regarding the above mentioned installation instructions or Stego products, please call us at +1 877-464-7834 for technical assistance. While Stego employees and representatives may provide technical assistance regarding the utility of a specific installation practice or Stego product, they are not authorised to make final design decisions.

www.stegoindustries.com
VAPOUR BARRIER

The Stego Wrap Installation. Stego Crete Claw Tape should be
Install 150 mm wide Stego Crete Claw Tape on the entire perimeter of
Install additional Stego Crete Claw Tape if required. Lab and simulated
field tests have shown that if 150 mm wide Stego Crete Claw Tape is
completely on Stego Wrap.

Prior to the placement of concrete, ensure that Stego Crete Claw Tape

4.

a project-by-project basis.

NOTE:
Clean surface of Stego Wrap to ensure that it is free of moisture and
debris prior to the installation of Stego Crete Claw Tape.

Install 75 mm or 150 mm Stego Crete Claw Tape on the entire
perimeter of the Stego Wrap installation. Stego Crete Claw Tape
should be completely on Stego Wrap.

Clean surface of Stego Wrap to ensure that it is free of moisture and
debris prior to the installation of 150 mm wide Stego Crete Claw Tape.

Overlap seams a minimum of 150 mm (6”). Seal all seams in Stego
Wrap using Stego Crete Claw Tape.

Install 150 mm wide Stego Crete Claw Tape on the entire perimeter of
the Stego Wrap Installation. Stego Crete Claw Tape should be
completely on Stego Wrap.

Install additional Stego Crete Claw Tape if required. Lab and simulated
field tests have shown that if 150 mm wide Stego Crete Claw Tape is
installed on all seams and around the perimeter, then it is more than
strong enough to support Stego Wrap. If determined by the architect
or engineer, additional Stego Crete Claw Tape may be specified.

Prior to the placement of concrete, ensure that Stego Crete Claw Tape
is free of dirt or debris to ensure maximum bond to the concrete.

These are general instructions. Installation requirements may change on
a project-by-project basis.

IMPORTANT - For the application of securing Stego Wrap to the
bottom of the slab, always use 150 mm wide Stego Crete Claw Tape.

NOTE: Stego Industries, LLC’s ("Stego") installation instructions are based on ASTM E1643 - Standard Practice for Selection, Design, Installation, and Inspection of Water Vapour Retarders Used in Contact with Earth or Granular Fill Under Concrete Slabs. These instructions are meant to be used as a guide, and do not take into account specific job site situations. Consult local building codes and regulations along with the building owner or owner’s representative before proceeding. If you have any questions regarding the above mentioned installation instructions or Stego products, please call us at +1 877-464-7834 for technical assistance. While Stego employees and representatives may provide technical assistance regarding the utility of a specific installation practice or Stego product, they are not authorised to make final design decisions.
